Keywords: First Keyword, Second Keyword, Third Keyword, Up to Four keywords.

1 Introduction

Please note that the first paragraph of a section or subsection is not indented. The first paragraphs that follows a table, figure, equation etc., does not have an indent either. Subsequent paragraphs, however, are indented.

2 Second Section

Please note that in this section, the mathematical formulation, methodology etc., can be presented briefly. Attention should also be given to the important results and relevant discussion that can presented in a separate section.

3 Result and Discussion

The following Table 1 gives a summary of all heading levels. Table captions should be at the top of the tables and captions for figures should be below the figures.

Table 1. Table captions should be placed above the tables.

Heading level	Example	Font size and style
Title (centered)	Lecture Notes	14 point, bold
1 st -level heading	1 Introduction	12 point, bold
2 nd -level heading	2.1 Printing Area	10 point, bold
3 rd -level heading	Run-in Heading in Bold. Text follows	10 point, bold

Displayed equations are centered and set on a separate line.

$$x + y = z \tag{1}$$

Please try to avoid rasterized images for line-art diagrams and schemas. Whenever possible, use vector graphics instead (see Fig. 1).

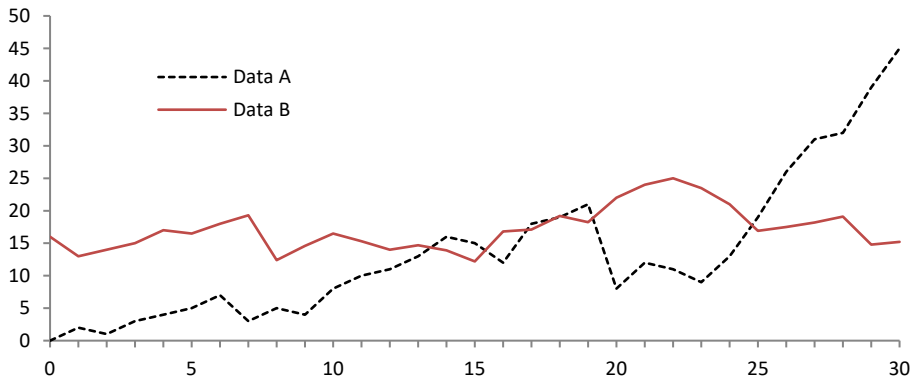

Fig. 1. A figure caption is always placed below the illustration. Short captions are centered, while long ones are justified. The macro button chooses the correct format automatically.

For citations of references, square brackets and consecutive numbers should be used. The following bibliography provides a sample reference list with entries for journal articles [1], an LNCS chapter [2], a book [3], proceedings without editors [4], as well as a URL [5].

Acknowledgement: Please place your acknowledgments at the end of the paper, preceded by an unnumbered run-in heading (i.e. 3rd-level heading).
